Engineering

WORK EXPERIENCE

Full-Stack Developer

Matagora Inc. – Montréal - QC

09/2023 - Present

- Develop and maintain high-performance applications using TypeScript, Node.js (NestJS).
- Implement and maintain back-end services, APIs, database schemas and queries (PostgreSQL) and ensure high performance, security, and scalability.
- Design and implement responsive and user-friendly web interfaces using HTML, CSS and JavaScript, and front-end frameworks such as Next.js.
- Write clean, modular, reusable code and libraries for future use.
- Collaborate with other developers and participate in code reviews to ensure code quality and adherence to coding standards.

ACADEMIC PROJECTS

Bookstore

[GitHub](#)

- Developed in C# (ASP.NET Core7 framework, Razor Pages, Entity Framework Core), MySQL & Bootstrap css.
- eCommerce website for selling books with admin Panel page that gives you full control over books and categories.
- Sign-up/login/logout features, automatically redirect unauthenticated users if they access a restricted page.

Barber Shop

[GitHub](#)

- Developed in Java (Spring Boot framework, Thymeleaf template, Hibernate/JPA), MySQL & Bootstrap css.
- Allows customers to book appointments and check the availability of barber calendars.
- A confirmation message when order is completed with information about the booking.

Hotel Management System

[GitHub](#)

- Developed in PHP (Laravel 10 framework, Blade Templates, Eloquent ORM, Database Migrations), MySQL, Bootstrap css.
- Allows users to check the availability of the rooms according to their check-in and check-out date and book the room of their choice.
- Uses sign-up/login/logout features, password encryption.
- Full admin panel to perform all CRUD operations.

Movie Finder

[GitHub](#)

- Developed front-end user experience using Next.js, Tailwind css and RESTful API.
- get information and statistics about most popular movies.
- Implemented the App Router and API call to render relevant information.
